Executive summary

Situation

Low revenue growth

Low operating margins

Suboptimal customer mix

Product mix not future-ready

Geographical firewalling

Questions

Map to existing opportunities

Emerging opportunities

Best fit company

Resulting revenue and margin synergies

Criteria

3 emerging markets matter most for Renesas over the next 5-10 years

ADAS - Cement dominance in sector, US & EU play

AI - Forward integration into a \$10 bn open source market, recent Nvidia-Arm deal worth \$40 bn

IoT - Stronger play in an \$80 bn dollar market, global play

Impact

Short-term M&A opportunity

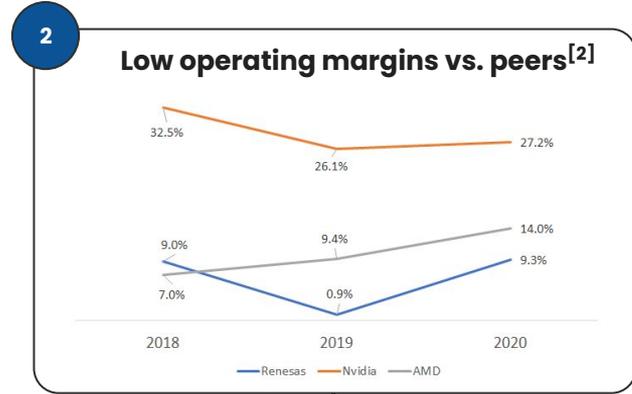

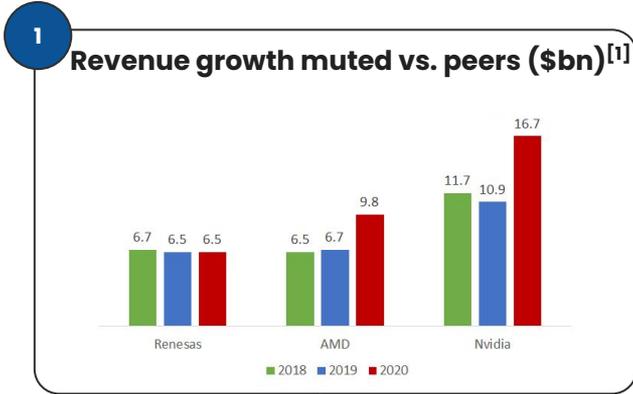

- \$14 bn revenue - 2025
- ~\$900 mn revenue synergies - 2025
- 25% operating margin - 2025
- ~\$400 mn margin synergies - 2025
- \$2 bn potential purchase price
- Recent Intel offer of \$2 bn

Long-term M&A opportunity

- \$22 bn revenue - 2025
- ~\$10 bn revenue synergies - 2025
- 26% operating margin - 2025
- ~\$3 bn margin synergies - 2025
- \$5 bn potential purchase price

Renesas is faced with 5 key concerns in its existing businesses

3 Suboptimal end-customer mix (auto)

Logos shown: Toyota (check), Nissan (check), Mercedes (cross), Tesla (cross), Honda (cross), VW (cross), BMW (cross), Audi (cross).

4 Geographic firewalling

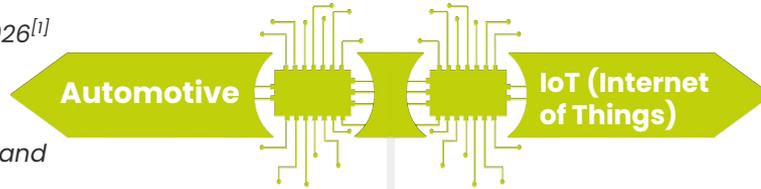

5 Product mix not future-proof

Logos shown: ADAS (check), IOT (cross), AI (cross).

We believe Renesas needs to address 3 key capability gaps

- ✓ \$130 bn semiconductor market by 2026^[1]
- ✓ Large ADAS opportunity - \$83 bn market by 2030 (12% CAGR)
- ✓ Supply constraints = near-term demand
- ✓ Opportunity to enter high-growth global OEMs (Tesla, Uber, Mercedes, VW)

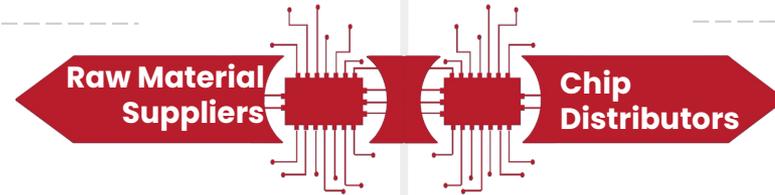

- ✓ 4th industrial revolution = \$80 bn market by 2025^[2]
- ✓ Growing twice as fast as the whole semiconductor industry
- ✓ Diversified suite of applications

- ✓ \$90 bn market by 2025, 18% CAGR^[4]
- ✓ High margins (40%+) in ISA segment^[3]
- ✓ Open source RISC-V ISA platform a large emerging opportunity

- ✓ Large growing market led by cloud computing (23% CAGR)
- ✗ Many large players like Intel, AMD and Qualcomm
- ✗ Renesas has limited prior experience/capability

- ✗ Most suppliers are very large, acquiring them is costly
- ✗ Low value-to-cost ratio

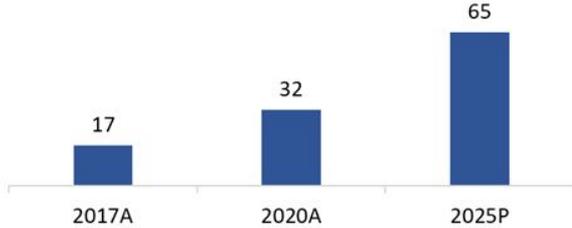

- ✗ Multiple players
- ✗ Low differentiation with respect to customer access
- ✗ Low margin potential due to low value-addition (no IP)

AI: Open source ISA platform a large and growing challenger to Intel and Arm^[1]

Semiconductors for AI a \$60+ bn opportunity by 2025 (18% CAGR)

AI Semiconductor Market (\$bn)

RISC-V open architecture core volumes estimated to grow by 140%+ CAGR till 2025

“AI applications driving up the demand for microprocessors & semi-cons.”
Expert Interview

“Companies are scrambling to integrate ML functions into microprocessors.”
Expert Interview

“AI applications for semi-cons growing 5 times as fast as non-AI applications.”
Expert Interview

“Watch out for niche AI semi-con companies.”
Expert Interview

“RISC-V is disrupting semi-cons, supporting flex designs, cost effectively”
Expert, cacm.acm.org

“The two largest ISA platforms are captive - Arm (Nvidia) and Intel. RISC-V is an emerging open source challenger”
Expert interview

Target shortlist based on strategic fit, addressable market and financials

Revenue = \$ 110 mn
1-Year Revenue CAGR = 40%
Margin = 40% - 50%^[6]
Valuation = \$ 2 bn^[2]

- Leading manufacturer of RISC-V open-source microcontrollers
- End-use: Boosting performance in edge devices (PC's, phones etc.)
- Received a bid from Intel for \$2bn in 2021
- Based in the USA

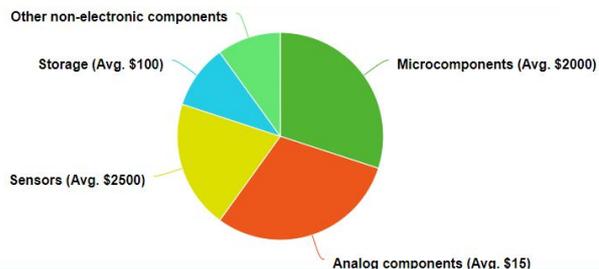

Revenue = \$ 170 mn
1-Year Revenue CAGR= 70%
Margin = 40% - 50%^[7]
Valuation = \$ 5.1 bn^[3]

- Emerging maker of server processing specialized RISC-V AI microcontrollers
- End use: Boosting performance in servers
- Based in the USA

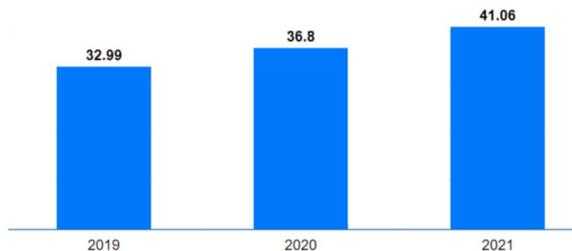

Sources: [1 & 4] Grand View Research [2] SiFive [3] SambaNova [5] Leewayhertz [6 & 7] Estimates from Arm Report

Automotive: Semiconductor demand estimated to be ~\$130 bn by 2026, driven by ADAS^[1]

Semicon demand in auto to rapidly grow – ADAS is the bridge ^[6]

ADAS – one of the fastest growing segments within auto (\$bn)^[5]

“Semicon companies looking into the future of mobility – into ADAS functionality”

Expert Interview

“ADAS is the perfect short-term segue into fully automated vehicles”

Expert Interview

“ADAS growth driven by demand for technology-powered safety features”

Mordor Intelligence Report

“Semiconductor shortage (3 month delay in supply), in the auto segment, caused by pandemic disruptions and low capacity build.”

McKinsey Report

“Cohu is seeing robust demand for its ADAS semiconductor-related products; revenue grew by 70% YOY while keeping expenses under control.”

Business Wire

Target shortlist based on strategic fit, addressable market and financials

Revenue = \$ 636 mn
5-Year Revenue CAGR = 45%
Margin = 11%
Valuation = \$ 1.5 bn ^[2]

- Leader in ADAS based semiconductors
- Extremely diverse product portfolio
- R&D in US, production and sales in Asia

Revenue = \$ 650 mn
5-Year Revenue CAGR = 0%
Margin = 47%
Valuation = \$ 5.5 bn ^[3]

- Sensor integrated IC manufacturer
- Leader in ADAS and EV products
- USA-based

Revenue = \$ 3.2 bn
5-Year Revenue CAGR = 18%
Margin = 11%
Valuation = \$ 9.5 bn ^[4]

- Key competitor of Renesas within auto
- ADAS products integrating specialized ICs
- Japan-based

Recommendations

Financials

Synthesis

IoT: Semiconductor demand to grow to ~\$80 bn by 2025^[1]

IoT semiconductor industry at healthy 15% CAGR ^[6]

“Explosive IoT adoption visible across health care, consumer electronics, industrial, automotive, BFSI, retail.”

Mordor Intelligence, Expert

“Improve margins through M&A and grow product portfolio to succeed in IoT Semiconductors.”

Deloitte

“5G wireless is the new breakthrough in IoT technology.”

Expert Interview

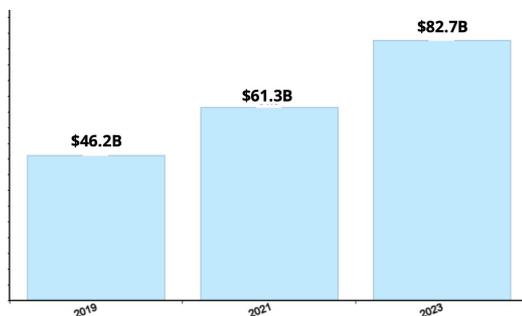

“IoT is much more that connection - it is that of detection and realization. The sensor sector in IoT is predicted to be a hot market.”

Expert Interview

“Sensors play an important role in creating solutions using IoT.”

Omron

Growth rate of sensor technology in IoT

Target shortlist based on strategic fit, addressable market and financials

amun

Revenue = \$ 4.1 bn
5-Year Revenue CAGR = 47%
Margin = 33%
Valuation = \$ 5.0 bn^[2]

- Leader in sensor and analog solutions
- Automotive, industrial, wearables
- Austrian company

SEMTECH

Revenue = \$ 548 mn
5-Year Revenue CAGR = 2%
Margin = 61%
Valuation = \$ 4.2 bn^[3]

- Analog semiconductors
- Builds on Renesas' two previous acq.
- USA-based with global sales

Ambarella™

Revenue = 223 mn
5-Year Revenue CAGR = -7%
Margin = 61%
Valuation = \$ 3.5 bn^[4]

- Leader in Vision/Imaging processors
- Applications in AI, IoT and security
- USA-based

*includes debt assumed for the transaction

Deal structuring and post-merger integration

Deal Structure

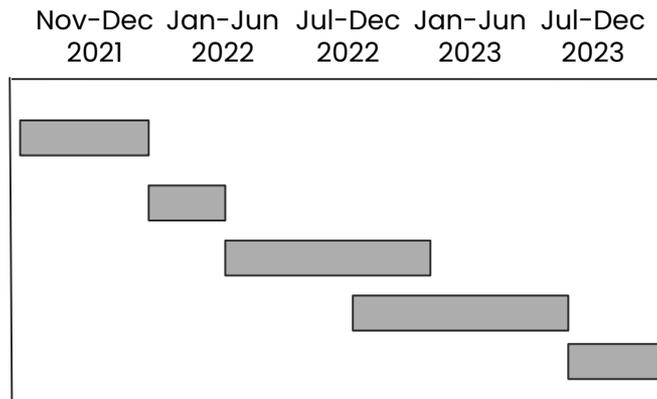

Total purchase price = \$ 2,000 mn
 Cash = \$ 200 mn => 10% of cash balance
 Equity = \$ 1,800 mn => 9% of market cap
 Debt = \$ 0 mn => No additional debt required

Key levers to maximise synergies

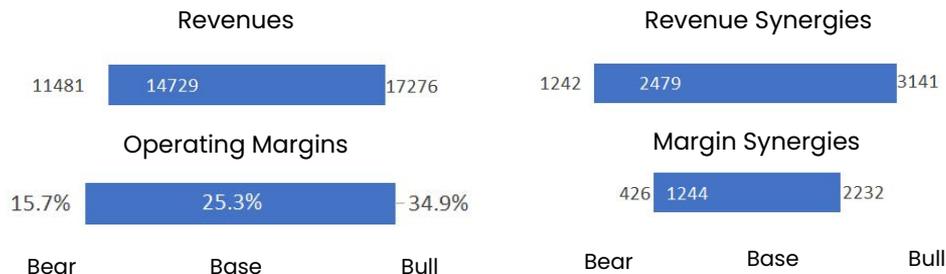

Timelines

Start negotiating with target
 Buy target
 Start revenue synergies
 Start cost synergies
 Possibly acquire AMS

Impact in 2025

Synthesis for M&A – Our final recommendation

RENESAS

By 2025

\$14.7 bn

Total Revenues

\$2.5 bn

Revenue Synergies

25%+

Operating Margin

\$1.2 bn

Margin Synergies

Additional recommendations

1

Target acquiring AMS based on growing cash balance and market cap, and lower debt, by 2025

2

Monitor players serving the rapidly emerging blockchain applications market

Qualitative Feedback

Walking us through how you came to this company was interesting. Though, I would say, you could spend slightly less time on the other companies and focus more time on Si-Fi that would be even better.

Well-designed presentation but spent a bit too much on the other acquisition candidates.

Confident presentation with very clear thought process laid out which demonstrates the huge amount of work clearly put into the case. Slides were clear and supported the verbal presentation well. Your bull and bear cases showed that you had considered risks as well as opportunities.
